

Use of EANCOM[®] Standard for Electronic Data Interchange

January 2011

Online-Survey on EDI Capability of our Business Partners

Please give us a few minutes of your valuable time to answer the following questions.

Simply use this digital form to answer all the relevant questions and finish by pressing the "Send"-button at the end.

We would be grateful to receive your reply until **January 2, 11, 2011**.

In case you allocate item data through several GLN (e. g. one GLN per brand name), you will need to fill in one form per GLN.

Should you have any queries, please contact:

Markus Kowolik

1. General Information	
Company	
Supplier Number (within ANWR Group)	
GLN ¹	
VAT Registration Number	

2. Required Standard Identifications

Our messages include the following identifications:

supported	unsupported
-----------	-------------

GLN ¹
GTIN/EAN (Global Trade Item Number)
FEDAS (Product Classification Key Sport)
EAS (Product Classification Key Shoe)

1) GLN (Global Location Number / since 01.01.2009 formerly ILN)

The GLN (Global Location Number) identifies the full company name and address on international area. It is assigned by the GS1 organizations. For Germany, it is GS1 Germany. For allocating a GLN license fees are required. The GLN is composed of 13 digits.

Use of EANCOM[®] Standard for Electronic Data Interchange

3. Outbound Messages

According to the guidelines of EANCOM[®] Standard, we are able to forward the following UN/DIFACT messages to the ANWR Group:

a) Master Data Alignment

PRICAT (Price/Sales Catalogue)	EANCOM D.96A	EANCOM D.01B	Other
supported			
supported from			

Use one of the following formats: "December 2011", "12.2011" or "Dec 2011".

b) Transactions

ORDRSP (Purchase Order Response)	EANCOM D.96A	EANCOM D.01B	Other
supported			
supported from			

DESADV (Despatch Advice)
supported
supported from

INVOIC (Invoice)
supported
supported from

4. Incoming Messages

According to the guidelines of EANCOM[®] Standard, we are able to receive the following UN/DIFACT messages from the ANWR Group:

a) Master Data Alignment

PARTIN (Party information)	EANCOM D.96A	EANCOM D.01B	Other
supported			
supported from			

Use of EANCOM[®] Standard for Electronic Data Interchange

b) Transactions

ORDERS (Purchase Order)	EANCOM D.96A	EANCOM D.01B	Other
supported			
supported from			

RECADV (Receiving Advice)
supported

c) Report and Planning

SLSRPT (Sales Data Report)	EANCOM D.96A	EANCOM D.01B	Other
supported			
supported from			

INVRPT (Inventory Report)
supported
supported from

5. Image Information

In addition to the master, transaction and report data, we will be able to allocate image data as follows:

supported	unsupported
------------------	--------------------

Supply of Images

Use of EANCOM[®] Standard for Electronic Data Interchange

	Product Images	Brand Logo
File Format		
Size (in pixel)		
Type of Deployment		

6. Terms of Delivery

Please state the earliest due-date for provision of data. We would appreciate to receive your pre-order-catalogue data until:

- for season Fall/Winter
 - **January (earliest time)**
 - **April (deadline)**
- for season Spring/Summer
 - **June (earliest time)**
 - **August (deadline)**

	Season Spring/Summer ²	Season Fall/Winter
Item Master Data		
Product Images		

2) In case you allocate a yearly catalog, please enter your delivery periods for seasonal Spring/Summer and choose a minus sign in season Fall/Winter.

7. Communication Technology

For data interchange we use following tranfer technology	
Address details	

8. Responsibility for EDI

Please designate a person in charge:

Last name:	
First name:	
Phone:	
E-mail:	

Use of EANCOM[®] Standard for Electronic Data Interchange

9. Conclusion

We would like to apply for a free FTP access to the Data Clearing Center.

Currently we are not able to provide electronic data.

Explanatory statement:

With the dispatch of this form, we confirm the data provided

- ✓ is accurate (all details are checked in form and content)
- ✓ is up-to-date and
- ✓ will be updated promptly and regularly.

The GS1 EANCOM[®] standard is an implementation guideline on the use of subsets of selected UN/EDIFACT messages. It specifies in detail the use of the relevant components of these UN/EDIFACT messages in order to support their electronic exchange between trading partner application systems.

The GS1 System is an integral part of the way business is conducted world-wide. It is a global multi-industry system of supply chain solutions that provides for the identification and communication of products, services and locations based on internationally accepted and business-led open standards for the benefit of the users involved.

The GS1 system is developed and managed by GS1, using the GS1 Global Standards Management Process (GSMP).

The GS1 International eCom standard, EANCOM[®], came about as a result of EDI developments among the GS1 Member Organisations. In 1987 at the GS1 General Assembly, the decision was taken that an international eCom standard based on UN/EDIFACT should be developed. GS1's international eCom standard, EANCOM[®], has been in existence since 1990. This release, the EANCOM[®] 2002, Edition 2008, constitutes the new EANCOM[®] standard.
